

## **Workers Compensation**

### **Claims Management and Reporting**

Effective claims management requires the Employer's First Report of Injury to be completed as quickly and accurately as possible. To ensure the best possible outcome, Hausmann Group strongly recommends that a claim be submitted within 24 hours of an employee notifying the employer of an injury.

Numerous studies have shown that as little as a three day delay in reporting can result in a 25% higher settlement and 50% higher likelihood of attorney involvement. This can result in a higher experience modification factor, higher insurance costs, and can make you less attractive in the insurance marketplace. Prompt reporting can also help you potential state imposed fines.

Proactively documenting, investigating, and reporting the incident to your carrier allows your employee to access effective treatment in a timely manner and will help them return to work as soon as possible.

Kinex Medical Company has workers compensation under policy number **UB6S318851** through:

**Travelers Insurance**  
**[www.travelers.com/claim](http://www.travelers.com/claim)**  
**Phone: 800-238-6225**

**Online: [www.mytravelers.com](http://www.mytravelers.com)**

Experience has shown that the more involved the employer is in resolving a workers compensation claim, the better the outcome. Hausmann Group's claims advocacy team will work diligently with your insurance carrier to bring the claim to a timely resolution. With your active participation, your employee will continue to feel a valued member of your corporate team while recovering.

Concerns or questions at any point during the course of the claim can also be directed to Hausmann Group's claims department at 608-257-3795.
